

05/13-DL-v1.1

COLLAK DL

Cleaner for bonded joints made of rigid PVC

1. DESCRIPTION

Solvent cleaner for bonded joints made of rigid PVC.

2. APLICATIONS

Cleaner for pipes and fittings made of PVC to use before application of our PVC adhesives: PVC-25, PVC-25 T, PVC-25 TC, PVC-75, etc.

PROPIEDADES FÍSICAS	
Colour	Colourless
Density	0,79 - 0,81 g/ml
Inflammability	Easily flammable

3. INSTRUCTIONS FOR USE

The surfaces to be bonded must first be cleaned of heavy dirt. Spray the cleaner onto a piece of cloth and thoroughly clean the dry surfaces to be bonded until they are free of grease, dirt and lubricant. Use a new piece of cloth for each cleaning operation. The surfaces cleaned with Collak DL must be dry before applying the adhesive.

4. PACKAGING

250, 500 mL or 1L metal cans.

5. HEALTH & SAFETY

Highly flammable product and irritating to eyes and respiratory system. Keep away from sources of ignition. Keep and use it in well-ventilated places. For further information, please read the Safety Data Sheet of our product available upon request.
